

BEHROUZ POOLADRAG(K)

WEB/APP DEVELOPER AND DESIGNER

PERSON SUMMARY

I have been working on computer science since 2008, and I have a strong background in design and develop many different types of projects that most of them are webs/applications. I have helped many companies to achieve their goals and improving their projects. And in the last four years alone, I have helped many clients with useful and up-to-date solutions regarding web or application. My real strength is to find a creative and useful way to do the project and break the project to some valuable part. I pride myself on my reputation to manage how to develop in a correct and fast way with high quality. Based on my different types of projects that I have worked on, I realized that I can quickly grasp new concepts and use them in real-world projects.
